

## Summative Assessment 2: Conversion Buddy Mobile App MobApp

Patrick A. Pangilinan      C3A - BSCS

### DIRECTION:

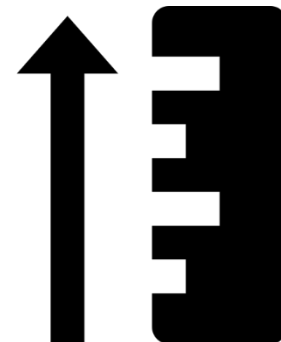

1. Create a new project and name it sa2-<section>-<lastname>.
2. Your task is to design and create a mobile application that will contain the following functionalities:
  - a. Money Converter – When this module is selected, the app will provide a conversion functionality from several currencies to Philippine peso. The currencies will include US dollar, Japanese Yen, KSA riyal, UAE dirham and UK pound.
  - b. Weight Converter – When this module is selected, the app will provide a simple conversion of kilogram to pound and vice versa
  - c. Height Converter – When this module is selected, the app will provide a simple conversion of centimeters to feet and vice versa.
3. Provide an icon for the application itself and for each module that will be available in the app.
